

ADDITION COVER-UP

Addition Cover-up is a simple addition game to practice your addition facts.

There are 3 games to choose from, one with facts to 12, another with facts to 20 and the hardest with facts to 40.

Age range: 2nd Grade +

Number of players: 2-3

Learning: addition facts to 12 (or 20 or 40), strategy and logical thinking

You will need

- Each player will need 10 counters of their own color.
- calculator (optional)

Instructions

- Each player chooses an addition fact to work out. If they get the fact correct, then they cover it up with a counter.
- If a player gets an answer wrong, then play passes to the next player.
- The first player to make a line of 4 counters (horizontal, vertical or diagonal) wins the game.
- If there are 3 players playing, then the first player to make a line of 3 counters wins the game.

Variations

- The opponent gets to choose the addition fact. The first player to place all their 10 counters wins the game.
- Harder game:
 - Each time a player makes a new line of 3 counters they can remove one of their opponent's counters from the board and return it to them. The first player to place all their 10 counters wins the game.
