

CLASSIFY IT! GAME #3

Age range: 2nd Grade +

Number of players: 2-3

Learning:

- Adding up the numbers on 3 dice
- Odd and even numbers to 18
- Vocabulary:
 - Multiple of ...
 - Odd and even
 - Greater/less than ...
 - Between ... and ...

A fun number addition and classification game which really helps to develop an understanding of mathematical vocabulary as well as addition skills.

You will need

- 8 different colored counters per player
- 3 dice

Instructions

- Each player takes turns to roll the dice and add them up. The player then chooses one classification hexagon on the board which matches the total they have rolled. They cover this hexagon up with a counter.
- If a person adds up the numbers on the dice incorrectly, or if they cannot find any hexagon which matches their number, they pass the dice on to the next player.
- The game finishes when all the hexagons are covered up.
- The winner of the game is the person with most hexagons covered.

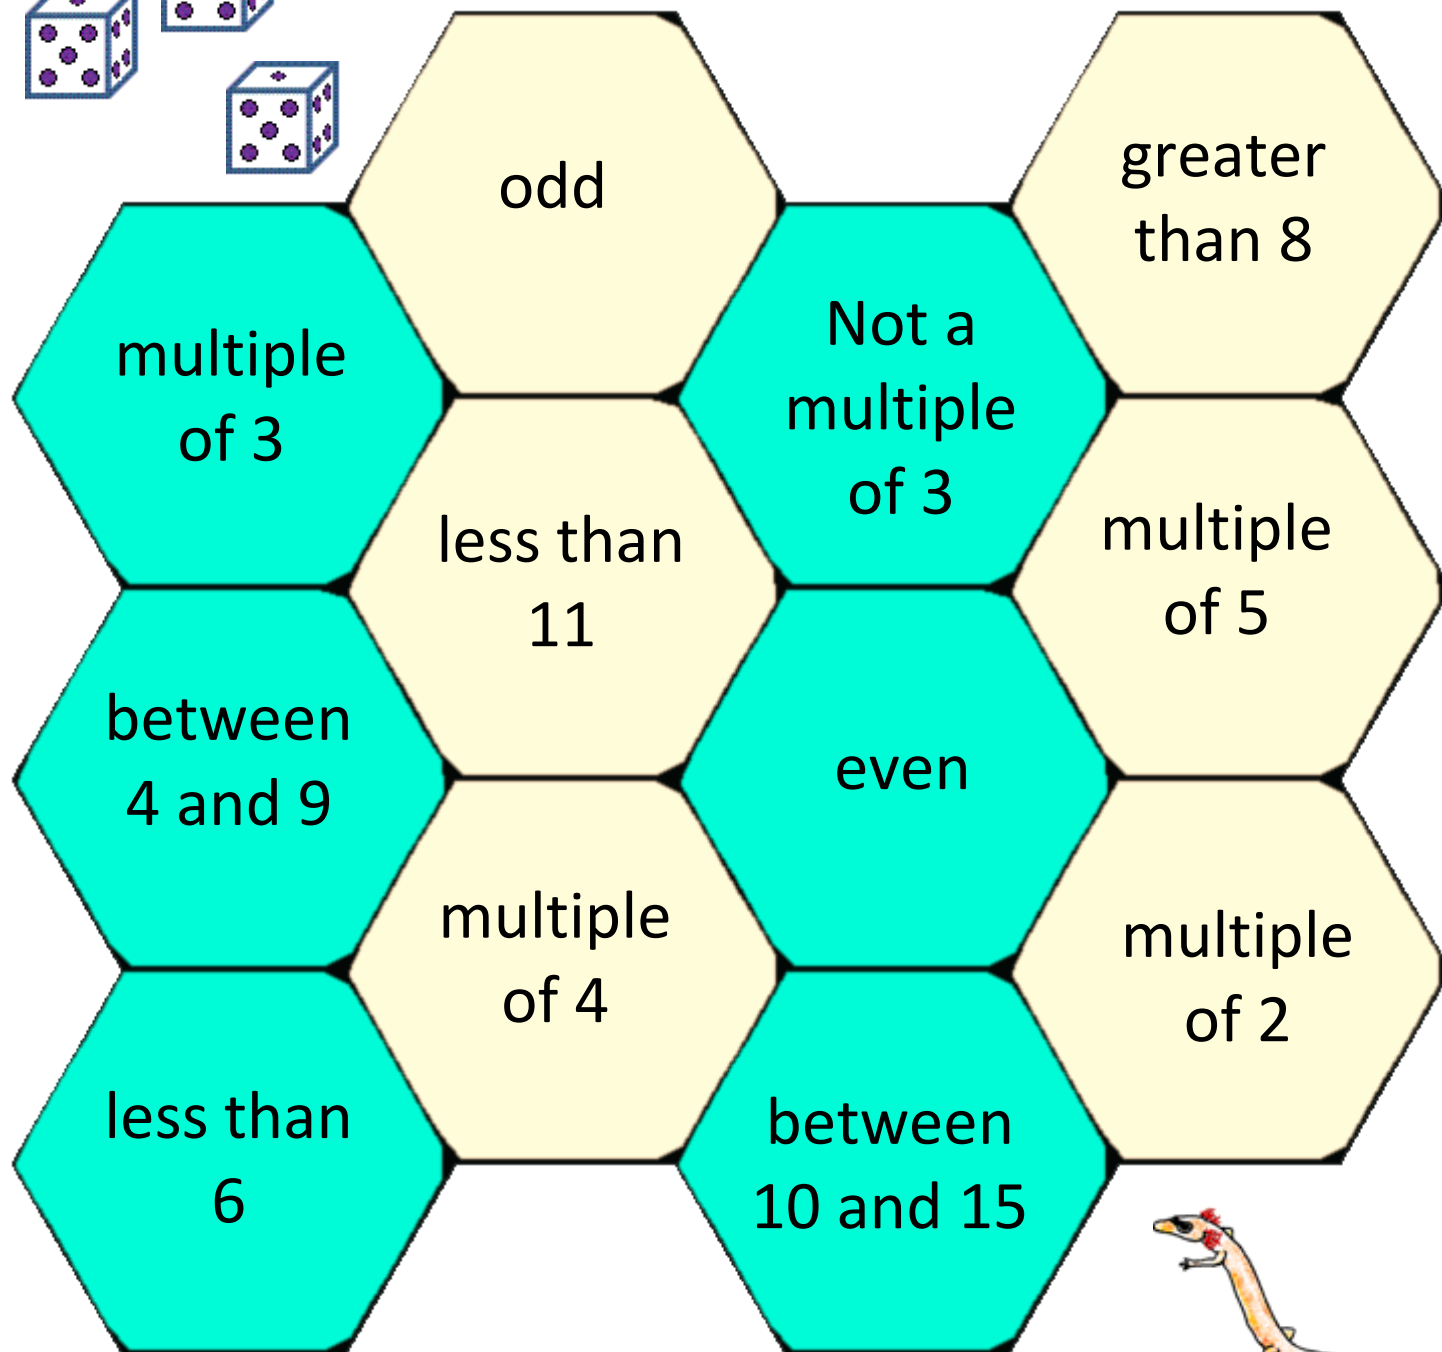

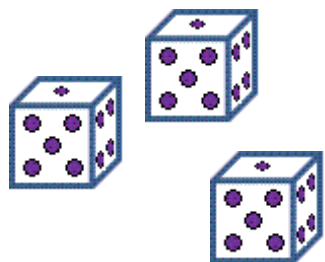

Variations

- Alternative winning strategy:
 - The winner of the game is the first person to get 3 counters in a row (vertical or diagonal).
