

Row of Coins Challenges 2D

Use the same coins (above) for both challenges.

CHALLENGE 1

Put the coins above in a row so that:

- the first and last coin have the same value
- the total of the first 3 coins is 36 cents
- there is one coin in between the two quarters
- the second coin has the lowest value

CHALLENGE 2

Put the coins above in a row so that:

- the first coin is worth half the value of the last coin
- the first 3 coins add up to 16 cents
- the last 3 coins add up to 60 cents
- there are 3 coins in between the two dimes
