*Question: is  $7 - 5$  the same as  $5 - 7$ ?*

No they are not the same.  $7 - 5$  means that we start at the number 7 and take away 5.  $5 - 7$  means that we start at 5 and take away 7.

Or using an example: if I have 7 pencils, then I can take away 5 of them leaving me with 2 left. But if I only have 5 pencils, I cannot take away 7 of them.
